

The Kentuckiana Health Collaborative (formerly the organizations known as the Kentuckiana Health Alliance Quality Improvement Consortium or KHAQI-C and the Kentucky Health Quality Agenda or KHQA) is pleased to announce the release of the 2010 *Consolidated Measurement Report*. Previous reports were sent from KHQA. This report was sent to health care providers throughout Kentuckiana and the state of Kentucky to provide feedback on the quality of care their patients received on selected measures. Anthem, Humana, Passport Health, and Kentucky Medicaid provided *only administrative* data for this confidential report. All measures use criteria established by HEDIS with the exception of the Colon Cancer Screening measure which did not follow HEDIS specifications and measured colorectal cancer screening on individuals ages 50-52. No chart review was conducted, although the national statistics provided did include chart review and therefore is not a true comparison. Individual provider data was NOT publicly shared.

## Explanation of Metrics

All measures except colorectal cancer screening use criteria established by HEDIS. HEDIS is a set of standardized performance measures designed to ensure that purchasers and consumers have the information they need to reliably compare the performance of managed health care plans (<http://www.ncqa.org>). However, this report used administrative data only. No chart review was conducted.
