

2010 Kentuckiana Health Collaborative Measures & Clinical Practice Recommendation Sources

The Kentuckiana Health Collaborative (KHC) has listed sources for clinical practice recommendations that correspond to the 2010 KHC measures. KHC measures use criteria established by the National Committee for Quality Assurance HEDIS Effectiveness of Care measures with the exception of colon cancer screening. This measure varies from the HEDIS measure by only reporting on individuals ages 50-52 that received colorectal screening, www.ncqa.org. You may also view this document at www.khcollaborative.org by clicking "Provider Resources" and then "Provider Tools."

KHAQI-C MEASURES	RECOMMENDATION SOURCES
Comprehensive Diabetes Care plus composite measure	American Diabetes Association - http://professional.diabetes.org/ Specifically http://professional.diabetes.org/CPR_search.aspx American Association of Clinical Endocrinologists http://www.aace.com Specifically http://www.aace.com/pub/guidelines
